

Azure

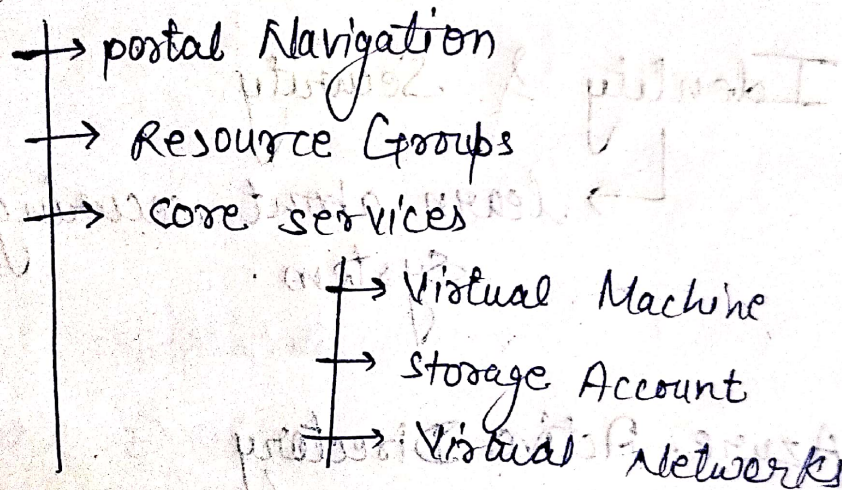

Phase-1

foundation

Phase-2

Core - AZURE

Phase-3

Compute + Storage Deep Dive

- * VMs, * PaaS Apps, * Blob, file, Queue
- * Load Balancer & Auto scaling

Practice

Practice

Practice

* Deploy a Website using VM.

* Host static website using Blob storage

PHASE-3

Networking

↳ Understand how everything connects

Master

- VNet
- subnet
- Network Security Groups
- Azure DNS
- VPN Gateway

PHASE-4

Identity & Security

↳ learn about securing real-world system.

Master

- Azure Active Directory
- Role-Based Access Control
- Managed Identities
- Key Vault

Phase-5

Infrastructure as Code

→ Now at this stage, stop clicking start automating.

Master

- ARM Templates
- Terraform.
- Azure CLI & powershell.

Phase-6

DevOps on Azure.

→ Automate delivery pipelines

Master

- CI/CD pipelines
- Azure DevOps.
- Github Actions
- Containers Basics

Phase-7

Containers & Kubernetes

Master

- Docker
- Kubernetes
- Azure Kubernetes Services.

Phase-8

Monitoring & Optimization

Master

- Azure Monitor
- Log Analytics
- Application Insight
- Cost Optimization

Phase-9

Advanced.

- * Serverless
- * Event driven architecture.
- * AI Integration
- * Multi-cloud strategy basics
